DETAILED ACTION

This communication is filed for response received on 01/13/06 and IDS received on 02/09/06.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Taylor on 02/06/06.

Cancel claims 86 – 128 and 132 – 274.

Allowable Subject Matter

Claims 1 – 85 and 129 – 131 are allowed.

The following is an examiner's statement of reasons for allowance: As to claims 1 – 85 and 129 – 131, the prior art fails to show an adhesive having a release temperature operable to attach one of the positive and negative poles of the first magnet to the same polarity pole of the second magnet below the release temperature and operable to release the first and second magnets from one another above the release temperature wherein the first and second magnets move with respect to one another when the adhesive releases the first and second magnets and one of the

positive or negative polarity poles of the second magnet for generating a magnetic field different than the first magnetic field. These features taken together with the other limitations of the claim renders the claims allowable over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art of Record

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Simunovic et al. (6,776,523) is cited for its disclosure of a method and system for conservative evaluation, validation and monitoring of thermal processing.
